## 7. Problem with cookies alert

In screen > 992 px, I have the cookies alert OK.

But in smaller screens, the "up button" is hiding the Cookies alert:

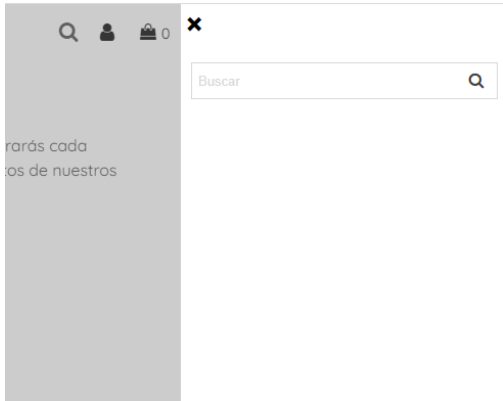

What I have to modify to see the cookies alert in mobile?

## 8. Search bar

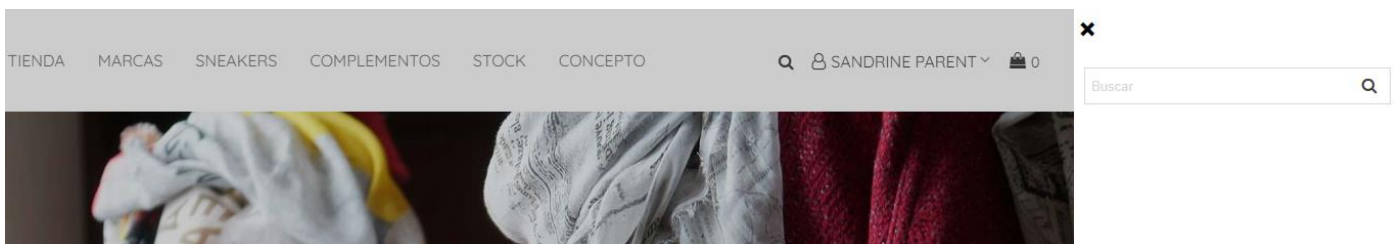

Screen:

Mobile:

I want the mobile version in big screen too:

How?

## 9. Account

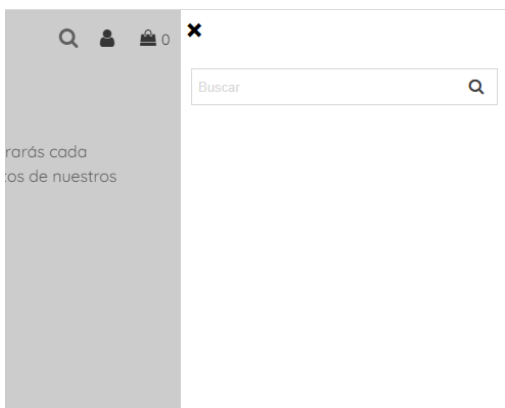

Screen:

Mobile:

I would like in all screens, small or big, something like the search bar:

← Mi cuenta  
Desconectar

Is it possible?

## 10. Zoom product in mobile

I checked "Disable zoom for touch devices."  
And "Enable Thickbox: No".

Zoom inside the photo in mobile phone has an effect strange. If I enable Thickbox, the photo isn't big. It's smaller than the small photos.

I want to know if it's possible to have a real big zoom when I click on the zoom icon and if it's possible to move the photo as the screen version in this new window.
