

Cloudflare dashboard for kingmobilete.com. The page shows two toggle switches for 'Always Online' and 'Mode Développement', both currently turned off. The 'Mode Développement' section includes a warning: 'Remarque : L'activation de cette fonctionnalité peut augmenter considérablement le chargement du serveur d'origine. Comme le mode Développement ne vide pas le cache, les fichiers doivent être vidés à l'expiration de ce mode.' The Windows taskbar at the bottom shows the time as 17:45 on 02/11/2020.

Symfony Exception page showing a FatalErrorException. The error message is: 'Compile Error: Declaration of AdminvcontentanywhereController::setMedia() must be compatible with AdminControllerCore::setMedia(\$isNewTheme = false)'. The exception details show the file path 'in modules/jscomposer/controllers/admin/AdminvcontentanywhereController.php (line 9)' and the following code snippet:

```
4 require_once (dirname(__FILE__) . '/../classes/vcontentanywhere.php');
5
6 if (defined('_PS_3SCOMPOSER_IMPORT_DIR_'))
7     define('_PS_3SCOMPOSER_IMPORT_DIR_', _PS_ROOT_DIR_ . '/modules/jscomposer/import/');
8
9 class AdminvcontentanywhereController extends ModuleAdminController
10 {
11
12     protected $countries_array = array();
13     protected $position_identifier = 'id_vcontentanywhere';
14     public $page_type = 'shop';
```

The Windows taskbar at the bottom shows the time as 17:45 on 02/11/2020.
